

## Letter of Recommendation

To the Admission Committee,

I am pleased to write this letter of recommendation for Mr. Tarun Singh, who recently interned with us at NEW EIC as a Software Development Engineer Intern. During his time with our company, Tarun made significant contributions to our web information management system development.

Tarun's technical expertise and hands-on experience with the MERN stack were vital to the successful delivery of our web-based projects. His role involved participating in the development of robust and scalable web applications, working extensively with MongoDB, Express.js, React.js, and Node.js. Tarun showcased his full-stack development skills by efficiently managing both frontend and backend tasks, ensuring seamless integration between components.

Additionally, Tarun contributed to the quantitative strategy report design, where he helped with data processing, visualizations, and report generation. His understanding of how to translate complex data into actionable insights was impressive, and he consistently worked well within our team to meet project goals and deadlines.

Beyond his technical abilities, Tarun demonstrated excellent communication and collaboration skills. He was always proactive, took ownership of tasks, and showed an eagerness to learn and improve. His ability to quickly grasp new concepts and adapt to challenges was noteworthy.

I am confident that Tarun has the skills, work ethic, and attitude to succeed in any future software development or technical roles. I wholeheartedly recommend him for any such positions and look forward to seeing his continued growth and success.

Please do not hesitate to contact me if you need any further information.

Sincerely,

A handwritten signature in black ink that reads "Chris Pan". The script is fluid and cursive, with the first letters of "Chris" and "Pan" being capitalized and prominent.
